Setup for your AnyCast Dongle

If AnyCast connected to your Home WiFi Network/Router, then please connect your phone or laptop to the same Home WiFi Router. Launch the Web Browser on your Phone or Laptop, then access the IP address 192.168.203.1 or the IP shown on the TV's main screen to enter the AnyCast Setup Page.

If AnyCast Dongle is not connected to any Home WiFi Network/Router, Anycast displays its own WiFi network & Password on the main screen. Connect your Phone or Laptop with AnyCast's WiFi, Once connected launch the browser and enter IP 192.168.203.1 to open up the setting portal. Navigate to WiFi settings and connect the AnyCast with your home WiFi network.

Settings and Firmware Upgrade

1. Internet : Connect your AnyCast to your Local/Home WiFi Network. Note : The connection between AnyCast and your device may be disconnected when AnyCast connects to Local/Home WiFi network Instead.
2. Password : Change the password of AnyCast Dongle
3. Resolution : Output resolution of AnyCast
4. EZAir mode : Mirror only (recommended) Mirror+streaming for iOS 11.1 and 11.2
5. Upgrade : Upgrade the firmware of AnyCast Dongle

Hardware Installation

1. Turn on your TV and Power up the AnyCast Dongle by connecting the USB cable from the Dongle to a USB adapter (5V1A). Please place the WiFi receiver at a location with good WiFi Reception.
2. Connect the Anycast Dongle directly into an HDMI input port of your TV.
3. Set your Tv's source/Input selection to HDMI input port connected to the AnyCast Dongle.
4. Your AnyCast Dongle now starts up and will display instructions on your TV screen. Follow the instructions to complete setup.

②

Companion App - EZMira

Download and install EZMira to your Windows 10 Laptop from <https://Any-Cast.com/app-download>

Then you may mirror Windows to AnyCast using EZMira as below.
